SECURITY THAT WORKS 24/7

Protecting your account starts with staying alert. Recently, a member received a multi-factor authentication (MFA) code that they did NOT initiate. They called us immediately, helping to stop fraudulent access to their accounts.

MFA adds an extra layer of security by requiring a verification code before access is granted.

If you ever receive a code you did not request, do NOT share it with anyone and contact Members Trust immediately.

For even more protection, set up account alerts within the mobile app to monitor transactions, login activity, balances, and more in real time. A few quick settings can help you spot suspicious activity faster and keep your accounts secure.

SAFEGUARD AGAINST THE UNEXPECTED

Your family means everything to you. If the unexpected happens, you don't want an emotionally difficult situation to be compounded by financial worry. Debt Protection with Life Plus provides that extra peace of mind.
